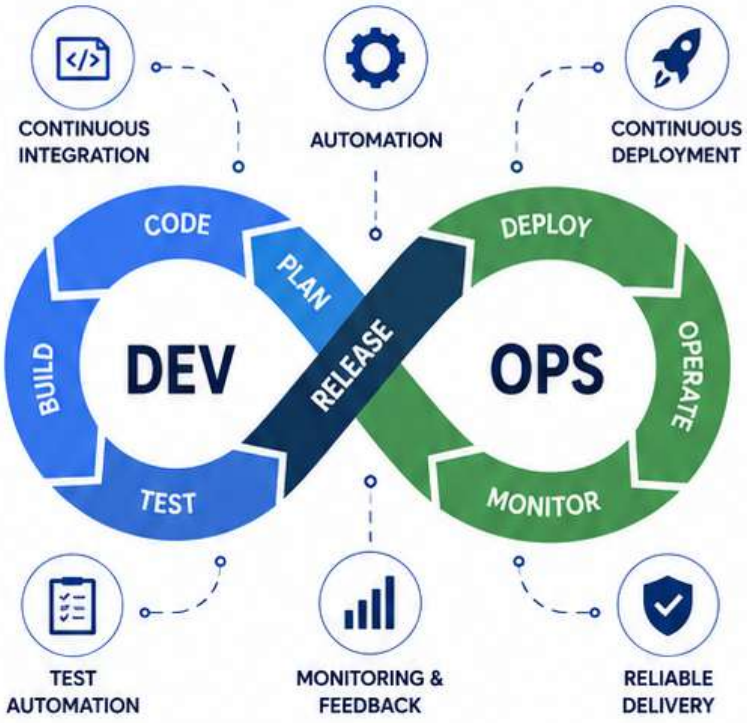
EXCELLENCE TECHNOLOGY

TESTING DEVOPS

Quality. Speed. Collaboration. That's DevOps Testing.

Learn how to ensure **quality** at every stage of the DevOps lifecycle. Integrate testing seamlessly into **CI/CD pipelines** and deliver reliable software faster.



WHY TESTING IN DEVOPS MATTERS?

FASTER FEEDBACK
Find issues early and deliver high-quality software faster.

IMPROVED QUALITY
Integrated testing ensures robust, reliable, and secure applications.

BETTER COLLABORATION
Encourage seamless collaboration between development, testing, and operations.

REDUCED COST
Early bug detection reduces rework and lowers costs.

CONTINUOUS IMPROVEMENT
Monitor, learn, and improve with every release.

HIGHER CUSTOMER SATISFACTION
Deliver stable releases that delight your customers.

WHAT IS TESTING DEVOPS?

Testing DevOps is the practice of integrating testing activities throughout the DevOps lifecycle. It ensures that **quality** is built-in, not added later. It combines **people**, **processes**, **tools**, and **automation** to deliver value continuously.

KEY AREAS YOU WILL LEARN

- Shift-Left Testing Approach
- Test Automation in DevOps
- CI/CD Pipeline Testing
- Performance & Load Testing
- Security Testing (DevSecOps)
- Infrastructure as Code Testing
- Monitoring & Logging Validation
- Service Virtualization
- Continuous Testing Strategy
- Tools & Best Practices

TOOLS YOU WILL WORK WITH

Jenkins | GitLab | GitHub
Selenium | JMeter | Katalon
Cypress | Postman | Docker
Ansible | Prometheus | Grafana

WHO CAN JOIN?

Students & Graduates | Developers & Testers | DevOps Engineers | QA Professionals | IT Professionals & Freshers

EXPERT TRAINERS — Learn from industry professionals

HANDS-ON LABS — Real-world projects & practical sessions

CERTIFICATION — Industry-recognized certificate

PLACEMENT SUPPORT — Resume, interview prep & job assistance
